# Product Analyst

We are a team that knows how to build world-class products, with experience in 5 different unicorns. Our passion is breaking down barriers to decision-making at industrial scale.

We are providing competitive base and stock option packages. This is a unique opportunity but is not for everyone. The ideal candidate has confidence in her/his skills and ultimately shares our entrepreneurial drive to build a world-class company.

## About the Role

We are seeking a highly-skilled Product Analyst to join our dynamic team. As a Product Analyst, you will be an integral part of our product development cycle, working closely with designers, engineers, and data scientists. Your responsibilities will include product analysis, design, testing, and data analytics, with a special focus on leveraging Generative AI technologies to drive innovation and growth.

## Key Responsibilities

- Conduct comprehensive product analysis to identify areas of improvement and potential growth opportunities
- Collaborate with cross-functional teams in the design and testing phases to ensure the product meets the intended business objectives and user needs
- Utilize data analytics tools to gather insights from user behavior, market trends, and KPIs
- Work closely with our data science team to incorporate Generative AI technologies into our product roadmap
- Create clear and effective reports and presentations to communicate findings and recommendations to both technical and non-technical stakeholders
- Perform A/B tests to analyze user engagement and behavior
- Act as a subject matter expert, staying updated with industry trends, specifically in the realms of data analytics and Generative AI technologies

## Qualifications

- Bachelor's degree in Computer Science, Statistics, Industrial Engineering, Data Science, or a related field

[www.glov.ai](http://www.glov.ai)

- Minimum of 2-3 years of experience in a similar role, ideally within a fast-paced, high-growth environment
- Proficiency in data analytics tools like SQL, Python, R, and various data visualization tools
- Understanding of Generative AI technologies and their potential applications
- Exceptional analytical, problem-solving, and communication skills
- Ability to collaborate effectively with cross-functional teams

## What We Offer

- Competitive salary and stock option packages
- Opportunity to work with cutting-edge technology
- A collaborative, innovative work environment
- Flexible work hours and remote work options

## How to Apply

If you are confident in your skills and share our passion for breaking down barriers to decision-making at an industrial scale, we want to hear from you. Please submit your resume along with a cover letter detailing your relevant experience and explaining why you are the best fit for this position.
